

REGENCY RAILINGS | SYSTEM OVERVIEW

Railing Panels

Regency offers prefabricated panels of hand forged ironwork for wood staircases. The innovative, patented railing panels are artfully crafted and meticulously designed to provide the look of a custom ornamental railing at a fraction of the cost.

Regency panels are designed to install directly into a closed stringer staircase with wooden handrail, reducing the need for welding, saving valuable installation time and labor costs. The Regency system includes panels suitable for level and angled applications and are engineered to accommodate virtually any staircase design regardless of radius or slope. No customization required. All panels meet the 4" sphere code requirement.

These versatile panels can be used in a variety of applications from railings to fences, gates, doors and furniture designs.

Design Options

Create elegant ornamental railings with a range of Regency panel styles that offer endless design possibilities. In this section you will find panels with beautiful, multi-dimensional scroll work, eye-catching and intricate detailing for an authentic hand-worked feel. Panels can be placed continuously for a seamless look or combined with forged spindles to create unique patterns featuring panels as the focal point.

FEATURES & BENEFITS

- ✓ Ornamental-style railings at a fraction of the cost
- ✓ Level and angled applications
- ✓ Flat and curved applications
- ✓ Direct installation on closed stringers
- ✓ Indoor and outdoor use

Forged Steel Spindles

Find a variety of forged steel spindles that complement panels to create endless railing designs.

- ▶ See Posts & Spindles in the Ornamental Components section or go to bezdanornamental.com.

REGENCY RAILINGS | SYSTEM OVERVIEW

Planning The Installation

The configuration of the railing framework will influence panel selection. A variety of panel styles and options are available within each series that can work with the framework height, slope, and curve of the chosen stringer type.

Closed or open stringers

Regency railing panels can be installed directly into a closed stringer application. For open stringer applications, choose the Tuscany SPV Series for direct installation into the stair treads or weld individual panels onto a steel bar base.

Level and angled applications

All railing panels can be installed on level applications. Each series can accommodate a range of angles. Always check the staircase slope to determine the correct angle required. Height requirements are different depending on the design and project type and can range from 32" to 38".

Flat or curved applications

All railing panels are available flat for straight applications without curves. Most series can accommodate curved applications with panels designed to suit virtually any layout.

Finishing

Panels are supplied in a flat primer to accommodate additional fabrication to suit the staircase framework. Once panels are fit to the framework, they can be painted, powder coated or faux finished. Railings can also be embellished to enhance design details such as a gold-leaf application on bandings for a high-end look.

Uniquely Handmade Components

Regency panels may include slight variations inherent to handmade products. These subtle differences are within stringent tolerances and are considered unique assets.
